**INFORMATION DISCLOSURE STATEMENT**  
**UNDER 37 CFR §1.56**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

Submitted herewith on Form PTO/SB/08 is a listing of documents known to Applicants in order to comply with Applicants' duty of disclosure pursuant to 37 CFR §1.56.

A copy of each non-U.S. patent document is being submitted to comply with the provisions of 37 CFR §1.97 and §1.98.

The submission of any document herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicants do not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any document which is determined to be a *prima facie* art reference against the claims of the present application.

**TIMING OF THE DISCLOSURE**

The listed documents are being submitted in compliance with 37 CFR §1.97(b), before the mailing date of the first Office Action on the merits.

**RELEVANCE OF EACH DOCUMENT**

Documents A3-A6 on the attached PTO/SB/08 were cited as being relevant during the prosecution of a counterpart Japanese patent application, specifically in a Japanese Office Action that issued August 2, 2005. Document A2 is the U.S. counterpart of Document A6. JP 2002-281116, which was also cited in the Japanese Office Action, was submitted in the present application in an Information Disclosure Statement filed on December 29, 2003, and thus is not submitted again. An English translation of the foreign-language documents is not readily available. However, the absence of such translation does not relieve the PTO from its duty to consider the submitted foreign language documents (37 CFR §1.98 and MPEP §609). English language abstracts of the foreign language documents are provided for the Examiner's convenience.

A translation of a portion of the Japanese Office Action that issued August 2, 2005, with respect to the counterpart Japanese patent application, is provided below:

Claims: 1 through 16

Cited literature: 1 through 5

Remarks: Cited Literature 1 describes how a folding portable telephone is opened and closed electrically in response to an incoming call, while Cited Literature 2 describes how the manner of vibration of a vibrator is controlled by comparing a calling telephone number to registered telephone number information. Modifying the manner of opening and closing of the portable telephone described in Cited Literature 1 in accordance with the calling telephone number is something which could be easily conceived of by a person skilled in the art.

Furthermore, Cited Literature 3 describes the point of repeatedly performing opening and closing operations, Cited Literature 4 describes a portable telephone which is axially supported on and rotates about an axis of rotation substantially perpendicular to the display surface, and Cited Literature 5 describes a sliding-type portable telephone. Application to these is also a matter which could be accomplished as appropriate by a person skilled in the art.
